“Ky, Birds, and The Nature Conservancy”

“Green River Basin and...”

Rachel Martin, from the Nature Conservancy is presenting our March program speaking on the General Green River Project—to promote Soil Health and Sustainable Ag practices amongst the farmers of the Lower Green River (see page 2 inset images). She also will talk briefly about her role as Soil Health/Working Lands promoter and about bird projects in the Kentucky region.

On the [NC website](#), she is quoted: “A PLACE I LOVE”— Rachel loves the Mammoth Cave area and Cumberland Falls. Pennyriple Park also holds some special memories. However, her favorite place in Kentucky is probably a clearing in the woods near where she grew up.

“For a ½-mile, the gravel road to our house boasted a canopy of the trees on either side that made it feel like going through a green tunnel,” says Rachel. “The scent of the woods always revealed the season—dank, rich earth overlaid by fresh spring rain, dry leaves crackling and then frost-lace and snow weighing branches down—in the back woods, we played in a creek and stood underneath a small waterfall. It was a great way to spend my childhood.”

March Newsletter Calendar:

- Mar 4:** • Fieldtrip work activity of installing posts and Bluebird houses on the Rudy Mines trails. We need volunteers to help dig, install posts, +morale, —meeting at Rudy Mines parking lot at 10 a.m.
- Mar 7:** DCAS monthly program: “Ky, Birds, and The Nature Conservancy” presented by Rachel Martin of the Nature Conservancy.-- 7 p.m.; “meet the presenter”, at Moonlite BBQ, 5:30 pm— **take note:** the program is at the Owensboro Museum of Science and History.
- Mar 18 (25):** Trash for Cash fieldtrip fundraising activity. Meeting place and time TBA at program. Rain backup date is Mar 25 the following saturday.
- Mar 20:** Board meeting 9:30 at Judy’s house.

Biggest Week in American Birding —

BIGGEST WEEK IN AMERICAN BIRDING 2017

The annual celebration of the warbler migration stopover at the edge of Lake Erie is scheduled for May 5th to 14th this year. Those who have participated in past years say it's not to be missed! Check it out at biggestweekinamericanbirding.com. Rooms at the Maumee Bay Lodge are already sold out, but 2 bedroom cabins are still available. So...if you're interested, get together with fellow birders and make your plans. DCAS members who've been in past years include Brenda and Tony Eaden, Pam and Jim Kimsee, Mary Kissel, Janet Howard, Theresa and Steve Graham. Get in touch with them for a taste of the Biggest Week.

2017 GREAT BACKYARD BIRD COUNT A SUCCESS—

At last count, Daviess County birders have submitted 19 checklists totaling 66 species over the Feb. 17-20, 2017 Count. The birder with the highest number of individual species was Steve Hahus with 58 (no real surprise here). Eight birders ventured to the J James Audubon State Park wetlands for a field trip and bird count on Saturday, Feb. 18th. They were treated to a sighting of TWO Bald Eagle pair among the 21 species sighted. The most accessible

spot for casual viewing of a pair was the pull off at the old Heron rookery site off US41 south of the Ohio River Bridge. The DCAS Board counted birds at the Virginia Miles Nature Center (behind OCTC) before their meeting on Feb. 20th and were treated to hundreds of Robins in the woods, including one mottled with multiple white feathers. In addition, there were a multitude of sparrows (Swamp, Song, Field, Fox, White-throated, and American Tree) and 23 Wild Turkeys. Well worth the effort. That same afternoon (and the last day of the GBBC) Judy Adams and eighteen 3rd and 4th graders at Girls Inc.

enthusiastically counted birds in the backyard habitat at Rolling Heights, earning an official “Great Horned Owl Award” from the GBBC folks. If you counted birds that week-end and forget to submit your checklists, it’s not too late. Just go to birdcount.org and click on “submit data”.

Judy Adams, wintering backyard bird.

Joe Ford nature Center Great Backyard Birdcount outing

Nineteen species of birds were spotted at the Joe Ford Nature Center on the opening day of the Great Backyard Bird Count. That number reflects birds spotted during the family count and earlier that morning. That total ties last year's record species count, despite warm weather that has suppressed feeder activity all winter in western Kentucky.

Highlights included the first GBBC red-breasted nuthatch in several years and the sighting of a red-tailed hawk building a nest along the tree row in the field adjacent to the JFNC property.

However, part of the GBBC mission is "fledging" the next generation of birders. Daviess County Audubon members Judy Adams, Jan Howard, Carolyn Williams and Mary Kissel and JFNC volunteer Rose Ann Radzelovage shared birding wisdom with the young participants.

Afterward, the students participated in a coloring contest.

Birds spotted on Friday, Feb. 17, included: Canada Goose 2, Cooper's Hawk 1, Red-tailed Hawk 1, Killdeer 1, Red-bellied Woodpecker 2, Downy Woodpecker 2, American Kestrel 1, Blue Jay 1, Carolina Chickadee 4, Tufted Titmouse 4, Red-breasted Nuthatch 1, Carolina Wren 1, American Robin 2, Northern Mockingbird 1, Yellow-rumped Warbler 2, Dark-eyed Junco 3, Northern Cardinal 4, Common Grackle 93 and American Goldfinch 4
